Finesse

100% Organic Worm Castings

- Finesse Earthworm Castings is one of Nature's best soil amendments, suitable for indoor or outdoor use.
- Mix Finesse Earthworm Castings into potting soils at the rate of 3%-5% by volume.
- Finesse may be top-applied to pots and beds in a ¼" to ½" layer every 2-4 months. For optimal results, also top-apply an equal amount of quality compost.
- Finesse may also be incorporated into the top several inches of pots or beds prior to planting or mulching. Repeat when transplanting to reduce transplant shock.
- After applying Finesse, care for your plants as you normally would.
