

Finesse SVC

100% Vermi-Compost
(Contains Natural Earthworm Castings)

- Finesse SVC is one of Nature's best soil amendments, suitable for indoor or outdoor use.
- Mix Finesse SVC into potting soils at the rate of 3%-5% by volume.
- Finesse SVC may be top-applied to pots and beds in a ¼" to ½" layer every 2-4 months. For optimal results, also top-apply an equal amount of quality compost.
- Finesse SVC may also be incorporated into the top several inches of pots or beds prior to planting or mulching. Repeat when transplanting to reduce transplant shock.
- After applying Finesse SVC, care for your plants as you normally would.
